

Hiking, Kibbutz and Beach in Eilat

18th to 25th December 2016 - 8 days

This tour is ideal for experienced hikers curious to discover the amazing diversity of a mountainous desert as well as an original way of life based on sharing and Hi-Tech.

At the southernmost point of the country, the landscape has been sculpted by dramatic geological movements. It created colorful mountains, deep canyons and breath-taking panoramas in over four countries (Israel, Egypt, Jordan and Saudi Arabia) with the Red sea and the Edom mountains as background.

On the same trail, you will encounter all the rock formations existing on earth, in one step you will cross more than 500 million years of geological history.

Impressive high tech organic desert agriculture has been developed in the Aravah valley. It uses the latest irrigation technologies by recycled water. The sight of cultivated fields and green houses in the middle of the desert is just amazing...
